CRIMINAL JUSTICE

The field of criminal justice is evolving. Embrace healing, restoration, and community building. Learn technical, investigative, and communication skills. Build your career in criminal justice and change the nation.

CYBERCRIME INVESTIGATIONS MINOR

Every crime has an element of digital evidence. Learn how to follow the digital breadcrumbs. We'll teach you how to use investigative technology to keep the Internet safe and pursue justice.

CYBERSECURITY

Ready to shape the future of cybersecurity? Learn how to protect computer systems, devices, networks, and databases from digital attacks. Graduate ready to earn three resume-boosting certificates - Certified Ethical Hacker, Certified Information Systems Security Professional, and Certified Forensic Examiner.

ECONOMIC CRIME INVESTIGATION

Use the power of accounting to fight for justice. This innovative major combines courses from criminal justice and accounting. Protect our economy and build the future with integrity.

HOMELAND SECURITY AND APPLIED INTELLIGENCE

Are you interested in collecting and assessing intelligence to anticipate and prevent terrorist attacks or threats from organized crime? This is the degree for you.

Learn to understand, track, and investigate criminal networks through the eye of an intelligence operator. Study under professors who have built careers in the field while you deepen your critical thinking and investigative skills.

STORIES LEADING THE WAY

"Hi, I'm Sam, and I graduated from Roberts with my degree in Homeland Security and Applied Intelligence with a minor in Cybercrime Investigations. My professors prepared me to land my current job, being a CyberTipline Support Specialist at the National Center for Missing and Exploited Children. I learned how to use different software such as Electronic Evidence Examiner and more. Roberts showed me what it's really like to work in this field."
